## Summary

---

I'm a curious person and developer by nature, so I will dig into anything in order to understand it. I am an active defendant of open source development, and continuously try to search for things to improve.

I have more than average knowledge about many things, making me a great asset anywhere. I combine pieces of knowledge from different places in order to build greater things. That's why I have so many personal projects going on in my free time.

## Skills

---

### Languages

#### Programming

- Python, Java
- C/C++, GoLang
- sed, awk, Bash, sh, RegEx, POSIX...
